Where

In the 1st edition of the festival, a select group of ice climbers opened up waterfall ice climbing routes in Manali - a high Himalayan valley in India, fast gaining the reputation of East's extreme sports capital.

Route Grades

Based in altitudes between 2200m to 4000m above MSL, the last year's routes range between grades **WI4 - WI6**, from single pitch to multi pitches.

Added to this the element of climbing in the thin air of high Himalayas.

The Draw

The possibilities are numerous and we are looking at first ascents of several cutting edge waterfall ice as well as mixed climbing routes in this remote part of the world, in the 2nd edition.

And we are hoping that strong contenders as you will take the trophy home!

When

The festival will be hosted between **26th Dec, 2018 - 2nd Jan, 2019.**
